

InfoCube

Interactive Patient Flow Solution

The InfoCube

- Increases throughput in any facility
- Improves patient satisfaction
- Automate and personalize communications with each patient
- Multi-language capability

Unique interactive two-way technology allows the InfoCube to provide an enhanced patient experience. InfoCube delivers accurate and automatic check-in while providing wait time data to management. Upon check-in, each patient is provided their own InfoCube interactive pager. This pager is utilized to communicate with the patient throughout their entire visit or just one part and eliminates the need for patients to stay in one area waiting for their name to be called.

Features and Benefits

- Optional patient initiated inquiries
- Wireless technology for simple installation
- Improves staff efficiency
- Individual messages may be sent to a patient
- Notification alerts issued for excessive wait times
- Real-time patient surveys
