

The InfoCube[®]

Transforming the management
of overflow customers

Increase Your Customer Satisfaction
Increase Revenue, Margins & ROI

Waiting for a table is now fun and entertaining. The InfoCube's digital screen with easy-to-use control panel provides your customers with interactive Entertainment & Information from the moment they enter your door.

Each unit comes equipped with a variety of user-selectable entertainment options including: **Sports Trivia, Fun Facts, Famous Quotes,** and a host of other options. Between the entertainment clips are carefully placed messages that you want to send directly to your customer.

The InfoCube Up-sells Your Patrons While They Wait

Imagine showing off your **Dessert Menu, Drink Specials,** or **Upcoming Holiday Hours.** You can introduce your **Executive Chef** or even display your **Entire Menu!** Your InfoCube is prepared to deliver a precise message to your customers while they wait for their table.

Features:

- Interactive Entertainment
- Updateable Content
- Mini Commercials Customized to Your Establishment
- Easy-to-use Attendant Station
- Patron Statistics
- Anti-theft System

Alleviate the negative impact of waiting that can effect
your customers & business!

The InfoCube Attendant Station

Visual InfoCube Status:

The Attendant Station is backlit for easy reading under any lighting condition. The status of each InfoCube is displayed on the screen. The Attendant Station is immediately notified when an InfoCube is out of range.

Whole Party or Individual Paging:

The Attendant Station performs all pages and receives confirmation of a successful page. The Attendant Station is able to page an entire party or page an individual of that party. This eliminates the arrival of the entire party at the Attendant Station when only one person is required.

Adjustable Channel Frequency:

The Attendant Station has a forty-five channel capacity. This flexibility allows for up to forty-five paging systems to operate in close proximity without interference. Pagers are not transferrable between restaurants.

The InfoCube Charging Stand and Attendant Station

The InfoCube

Table Ready Notification:

The InfoCube pager plays a low melody, lights up, vibrates and displays the graphical Maitre d' inviting you to your table, when it's ready.

Conserves Energy for Hours of Fun:

The InfoCube provides up to 10 hours of viewing on a single charge. The InfoCube recharges automatically when returned to the Charging Stand. The InfoCube will stop charging when full and will adjust its own power output to conserve battery life.

The InfoCube®

www.theinfocube.com

"... not only do customers enjoy it and their wait seems shorter, but it also takes a lot of stress off the hosts and hostesses"
~ Kate Treap, Stone Ridge Tavern

The InfoCube Records Patron Statistics

The InfoCube records important statistics which aid in management operations. The InfoCube records:

- Average Customer Wait-time
- Number of Pagers Used
- Number of Walk-away's

Patron statistics can be retrieved from the Attendant Station daily. **With The InfoCube, lost revenues will be a thing of the past!**

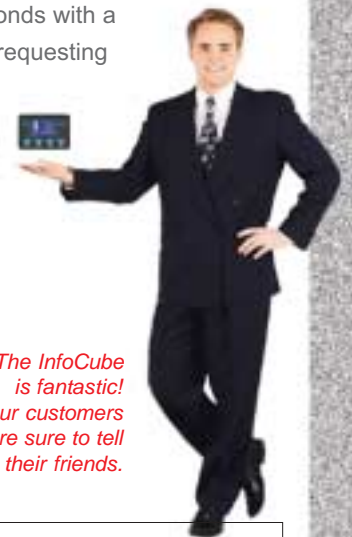

The InfoCube Has Memory To Spare

Each InfoCube has over 500 slides of information and entertainment for hours of fun.

The InfoCube Anti-theft System

The Out-of-Range Notification (adjustable to a maximum of 300 feet, 1 mile with repeaters) alerts the customer and the attendant when The InfoCube has moved out of range. The InfoCube responds with a gentle vibration and a message requesting the customer to return to the paging area. If the unit is not returned, the notification escalates to inform the customer that the unit will become inoperable. Lastly, the sound and vibration increase to their maximum, urging the customer to return to the restaurant.

The InfoCube is fantastic! Your customers are sure to tell their friends.
